

Finally,  
the **clarity**  
you've been  
searching  
for.

From the #1 dermatologist-recommended hair growth supplement brand comes a breakthrough Nutraceutical to address mild to moderate acne in women:

*Clear Skin Nutraceutical.*

Physician-formulated

Results  
in **4-12 Weeks**

Clinically tested

**100%** drug-free  
and vegan

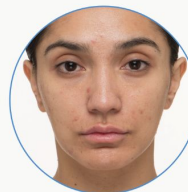

If you've been told to see acne as  
**just a skin problem**, that's a problem.

Our **whole-body approach** targets key root causes of acne and post-acne dark spots so you can see **clearer, smoother skin**.

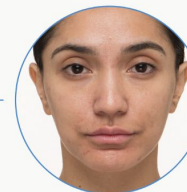

**1-4 weeks:**

Vitamins, minerals, probiotics, and natural botanicals reduce stress levels, aid metabolism, and support the gut microbiome to help **balance oil production and reduce acne breakouts.**<sup>1,6</sup>

**5-8 weeks:**

Ingredients begin to target normal hormonal fluctuations that can cause monthly breakouts to improve **skin clarity**, promote **smoother texture**, increase **skin hydration**, and reduce **redness.**<sup>8,10</sup>

**9-12 weeks and beyond:**

Ingredients continue to promote a healthy immune response and support healthy digestion to decrease acne overall for **visibly clearer skin** and improved **post-acne dark spots.**<sup>5,8,11,12</sup>

\*Results are based on our clinical study and may vary.

**14%** of women think  
their acne  
treatment is working.<sup>13</sup>

We think you  
deserve better.

At Nutrafol, our mission has always been to help people become the best version of themselves. Our whole-body approach to hair growth has given over 1 million people their confidence back—and now we're doing the same for women with acne.

We know the toll acne can take—mentally, physically, and emotionally—especially when every treatment you've tried (and you've tried them all) falls short.

So, we set out to do things differently.

In a culture full of quick fixes and surface-level solutions, Clear Skin Nutraceutical dares to go deeper. By **targeting bio-specific root causes** of acne breakouts, and the pesky marks they leave behind, we're changing the way the World sees Women's acne.
